Accessories & Options:

- Second Paper Feeder
(Includes 500-sheet Universal Tray)
- Third Paper Feeder
(Includes 500-sheet Universal Tray)
- 500-sheet Universal Tray
- 75-sheet Envelope Tray
- Extra Memory

(A PRINTER THAT DELIVERS)

What's the most flexible, high-speed, large-format business laser printer for anyone turning out miles of letters, reports and spreadsheets in a multitude of paper sizes? The Elite XL 20/600™ from GCC Technologies®.

At 20 pages per minute, the Elite XL 20/600 is the premier choice for businesses who want the sharpness of 600 dpi resolution, quickly, and the economy of multiple originals without running to the copier (if you need even higher resolution for graphics capabilities, take a look at some of the other members of the GCC family).

The Elite XL 20/600 comes standard with a 500-sheet universal paper tray along with a 150-sheet multi-purpose tray to handle envelopes and transparencies. The optional second and third paper feeders will support up to two additional 500-sheet paper trays for a total tray capacity of 1650 sheets. So you can mix and match letterhead, second pages, and memo paper.

The Elite XL 20/600's paper trays handle standard paper sizes from letter/A4 to tabloid/A3, with various other sizes supported through the standard multi-purpose tray. When you need to change toner, there's nothing simpler or cleaner than GCC's one-piece toner/drum cartridge.

The Elite XL 20/600 is also incredibly reliable. It's been designed to last for well over a half million pages of output. In addition, the Elite XL 20/600 offers true multi-platform printing. With PostScript and PCL languages built in, the printer can handle jobs from Macintosh, Windows, UNIX and DOS platforms effortlessly.

There's also flexibility in remote printer management. GCC's WebAdmin™ software allows you to change menu settings and perform printer diagnostics from virtually anywhere using the Internet.

The Elite XL 20/600 has built-in networking capabilities so it's ready to plug into your LocalTalk, EtherTalk, Windows NT, Netware or Berkeley UNIX network right out of the box. There are no network cards to purchase or install, and all the hardware has been pre-tested for you.

So, if you're looking for a large format business printer that combines speed, reliability, flexibility and GCC's continued commitment to quality and service, you're looking for the GCC Elite XL 20/600.

Memory Upgrades

Rapidly processes your complex documents
and graphics.

Produces near camera-ready resolution for
crisp, clear output.

Ensures compatibility with both Macintosh® and
Windows® platforms.

Produces output as large as 320mm X 900mm for
full bleed, A3 prints.

Results in halftones that are printed consistently
regardless of line frequency or resolution.

Designed to support up to 1650 sheets of paper;
more work is completed without having to
reload paper trays.

Comes ready to use with your existing
network – Ethernal™, TCP/IP.

Permits printing through all connections
concurrently.

Automatically differentiates and switches between
PostScript and PCL 5.

Provides remote access, via standard web browsers,
to printer interface settings, network protocol
parameters, printer status, paper handling
capabilities, and nearly every other aspect of the
Elite XL 20/600 printer from your computer.

Allows for the connection of an external hard
drive to expand your font library.

The standard 16 MB configuration can be
expanded up to 64 MB, using industry-standard
72-pin SIMMs.

Print Engine	Fuji-Xerox (P880)
Print Method	Dry-type electrographic printing
Engine Speed	20 ppm (A4 size, long edge feed)
Resolution	300/400/600 dpi (software selectable)
